

Project Specification/Version 1 Scope Goal

My version 1 of Multimodal Studio Hub will be a Streamlit-based resource discovery platform that allows college students and college instructors to search multimodal exemplars and download genre-specific lesson plans and assessment rubrics. It will be a functional prototype that demonstrates the core value of the Multimodal Studio Hub website without requiring authentication, collaboration, or database complexity. Since the website is fundamentally multimedia-focused, I am treating **user login** as a stretch goal and starting directly with a Streamlit interface.

Version 1 will demonstrate that instructors and students can:

1. Search multimodal resources
2. Browse exemplars
3. Download lesson plans
4. Download rubrics

User Stories for Version 1

User Story 1: Search Resources

A user can search a small collection of multimodal examples.

Features

- Search box
- Keyword filtering
- Cards displaying:
 - Title
 - Genre
 - Description
 - Tags

Example

Search:

digital storytelling

Results:

```
Digital Storytelling Example
Genre: Website
Description: Environmental advocacy project

Podcast Example
Genre: Podcast
Description: Student-produced audio narrative
```

User Story 2: Browse Exemplars

A user can view multimodal project examples.

Features

- Genre filter
- Example thumbnail
- Project description
- Link to project

Genres:

- Website
- Podcast
- Digital Story
- Video Essay
- Infographic

User Story 3: Download Lesson Plans

An instructor can browse and download lesson plans.

Features

- Genre selection
- Lesson plan preview
- Download button

Example:

```
Teaching Resources
└─ Digital Storytelling

Description
Learning Objectives
Classroom Activities

[Download PDF]
```

User Story 4: Download Rubrics

An instructor can browse and download rubrics.

Features

- Genre filter
- Rubric description
- Download button

Example:

Podcast Rubric

Criteria:

- ✓ Content
- ✓ Organization
- ✓ Audio Quality
- ✓ Accessibility

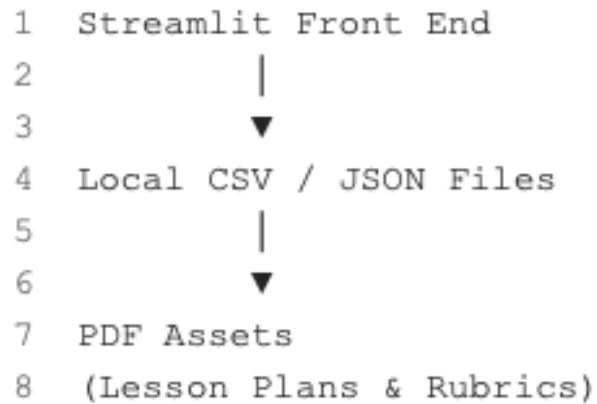

[Download PDF]

Streamlit Navigation

Main Tabs will be on left sidebar:

- 1 Multimodal Studio Hub
- 2
- 3 Home
- 4
- 5 Search Resources
- 6
- 7 Browse Exemplars
- 8
- 9 Teaching Resources
- 10
- 11 Assessment Resources
- 12
- 13 About

Technical Architecture for Version 1

This will not include database, authentication, user accounts, cloud hosting, or collaboration logic, and will allow me to demonstrate the complete user journey illustrated again below:
